Education

IIMT COLLEGE OF ENGINEERING

Bachelor of Technology in Computer Science

Sep. 2023 – Sep. 2027

Greater Noida, Uttar Pradesh

Relevant Coursework

- Data Structures
- Software Engineering
- Algorithm Analysis
- Database Management
- Computer Networks
- Operating Systems
- Computer Architecture

Experience

Cognifyz IT Solutions Pvt. Ltd.

Aug. 2026 – Sep. 2026

Web Development Intern

Remote

- Worked as a Web Development Intern from August 2026 to September 2026, gaining practical experience in web development.
- Worked on web development assignments while strengthening problem-solving, communication, coordination, and technical skills.
- Applied web development concepts to practical tasks and demonstrated attention to detail while completing assigned work.

Projects

Focus-on-Today | *HTML, CSS, JavaScript*

- Built a daily goal-tracking web application using HTML, CSS, and JavaScript to help users organize and complete their daily objectives.
- Added dynamic progress tracking that automatically calculates and displays the percentage of completed goals instantly.
- Added goal validation and completion functionality, preventing progress updates until all required goals are entered and visually marking completed goals with a strikethrough effect.
- Developed reset functionality and interactive UI animations, including progress-bar transitions, hover effects, and a continuously rotating sun icon for an engaging user experience.

Where in the World? — Country Explorer | *HTML, CSS, JavaScript*

- Developed a country exploration web application using HTML, CSS, and JavaScript, integrating the REST Countries API to dynamically fetch and display country information.
- Enabled real-time country search and region-based filtering, allowing users to find countries and refine results without page reloads.
- Created dynamic country detail pages displaying population, region, subregion, capital, native name, currencies, languages, and border countries.
- Added dark/light mode and designed a responsive, interactive UI using CSS Grid, Flexbox, hover effects, transitions, and mobile-friendly layouts.

Foodie Hamburger — Food Landing Page | *HTML, CSS, JavaScript*

- Created a mobile-friendly food landing page using HTML, CSS, and JavaScript, featuring a visually engaging hamburger-themed design with multiple food sections.
- Implemented a responsive hamburger navigation menu using JavaScript, allowing users to open and close the mobile navigation smoothly across different screen sizes.
- Added smooth scrolling navigation using section-based anchor links for Top Picks, Whopper, Stunner Menu, New Foodie Collection, and Deal of the Day sections.
- Designed a responsive UI using CSS Flexbox, media queries, sticky navigation, backdrop blur effects, and adaptive typography for desktop, tablet, and mobile devices.

Technical Skills

Languages: JavaScript, C++

Frontend: HTML5, CSS3, React.js, Next.js

Backend: Node.js, Express.js, MongoDB

Developer Tools: VS Code, Git, GitHub
